DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I, claim 1 in Paper No. 08/11/03 is acknowledged. The traversal is on the ground(s) that there would be no serious burden on the examiner. This is not found persuasive because a serious burden exists in the differing issues likely to arise during the prosecution of the product and process claims.

The requirement is still deemed proper and is therefore made FINAL.

2. Claims 2-5 are withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in Paper No. 08/11/03.

Claim Interpretation

3. The claims are product-by-process claims. A product by process claim is limited only by the structure implied by the claims, not to the specific manipulations performed to obtain the product. The claimed product comprises a porous product containing silicon carbide as indicated by the preamble and the claim language "performing reaction-bonding of the porous structural body so as to form silicon carbide having superior molten silicon wettability and to simultaneously form open pores caused by the reaction-bonding during which the reaction volume decreases"

The remaining process limitations are not considered to imbue the claim with any further structure because it merely recites the preparation and infiltration of carbon-containing and silicon-containing components that may be reacted to form silicon carbide.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The term "lightweight" in claim 1 is a relative term which renders the claim indefinite. The term "lightweight" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. For the purposes of examination, any porous material is considered to be necessarily "lightweight".

The phrase "silicon carbide having superior molten silicon wettability" is unclear because the word "superior" involves a comparison but there is no indication to what the silicon carbide is being compared.

Claim Rejections - 35 USC § 102

6. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

7. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Tani et al. (U.S. Patent 5,294,460, hereafter '460).

'460 teaches a porous composite body comprising carbon fibers and silicon carbide formed by the reaction between a resin and powdered silicon (col. 4, lines 45-68).
